1st July 10

I am delighted with the installation with the added bonus in that it is an air conditioner too so nothing better than to close the door and get out a choc ice whilst cooling off on a hot day. It was not in my first thoughts but much appreciated.

Should any of your reps such as Maurice want to bring anyone over to see the complete installation including the solar panels then please contact us to arrange it. The panels have generated 310 kwh so far and my supplier needs me to give a quarterly reading at the end of July.

Much obliged,

i
